Los Angeles, CA | 718-810-9394 | nicoles342@g.ucla.edu | LinkedIn | Github

Education

University of California, Los Angeles **Expected June 2030**
Bachelor of Science in Computer Science

Skills

- **Languages**: Python, Java, JavaScript, HTML/CSS, SQL
- **Frameworks & Libraries**: Django, DRF, Vue.js, Express.js, Node.js, OpenCV, NumPy
- **Databases**: MongoDB, SQLite
- **Tools & Technologies**: Git, Raspberry Pi, OpenAI Whisper, FFmpeg, Cloudinary

Projects & Technical Leadership

Classroom Polling Platform | *Django, DRF, Vue.js, JWT* **October 2025 – May 2026**

- Developed a Django/DRF backend for a real-time classroom polling platform supporting instructor-led sessions and student participation.
- Built RESTful APIs for session management, poll creation, student response validation, and vote aggregation, integrating WebSockets for live results.
- Piloted platform with approximately 40 students across two classrooms, incorporating instructor feedback to improve usability.

BinBuddy Autonomous Waste Collection Robot | *Python, OpenCV, NumPy, Raspberry Pi* **July 2026**
CIEE Engineering & Robotics Program in Tokyo, Japan

- Developed an autonomous vision and navigation system for a Raspberry Pi-powered waste-collection robot, integrating camera input, ultrasonic sensor data, and motor controls.
- Implemented HSV-based color detection to identify green trash-can markers from approximately 1 meter away; tested autonomous navigation and obstacle avoidance across 10 runs.

Girls Who Code | Co-Founder & Co-President **October 2023 – June 2026**

- Co-founded and led a 20-member Girls Who Code club, organizing technical workshops, collaborative projects, and guest speaker events.
- Developed and taught 7+ original Python and Java lessons, mentoring members through hands-on programming projects.

Experience

Software Engineering Intern, Summer Design Institute **July 2025 – August 2025**
Full-Stack K-Drama Tracker | Django, DRF, Vue.js, SQLite

- Built a full-stack K-drama discovery & tracking platform with authentication and personalized dashboards.
- Integrated the TMDB API and Spotify API to provide personalized watchlists, ratings, written reviews, reflections, progress tracking, and soundtrack recommendations.
- Conducted user testing with 10 students and incorporated feedback to improve usability.

Software Engineering Intern, Summer Design Institute **July 2024 – August 2024**
AI Video Summarizer | Node.js, Express.js, MongoDB, JavaScript, OpenAI API

- Built an automated pipeline to download YouTube videos, extract audio with FFmpeg, transcribe using OpenAI Whisper, and generate AI summaries; processed 10 videos, including hour-long recordings.
- Integrated Cloudinary with a Node.js/Express backend to manage media storage and automate video-processing workflows.

Athletics: Varsity Tennis Captain, Second Singles (2022–2026) | Varsity Handball Captain, First Singles (2025–2026)
